

Enable debug mode.

The password for debug mode is based on the router's MAC address. Look at the last digit of the router's MAC Address, shown in the output of the previous command. Mine was 'A'

Now find the corresponding password:

Last Digit Password
...0 or ...8 10F0A563
...1 or ...9 887852B1
...2 or ...A C43C2958
...3 or ...B 621E14AC
...4 or ...C 310F0A56
...5 or ...D 1887852B
...6 or ...E 8C43C295
...7 or ... F C621E14A

Enter the following command:

```
ATEN1 , <PASSWORD>
```

... you are now in "debug" mode.
